# Database access

## Access to the mouse database from any online computer

### System Requirements :

- Clients
  - Windows 2000, XP, Vista, Mac OS 10.4.8 or later, Linux
  - Java 5 or higher.
- Server
  - Windows or Linux
  - Java 5
  - Tomcat 5.5.x or Sun Java Application Server 9.01
  - PostgreSQL 8.2.4 or later

### Colony type

### Ability to...

#### Local colonies :

Researchers have direct access to mouse lines within the network.

Browse / search lines

View detailed information

Create line reports

Edit/ Create Line

Line management

Transfer / Import / Export

Make Requests

General Database Admin.

Management Interface

#### Remotes colonies :

Researchers do not have direct access to mice and make requests to caretakers.

Browse available lines

Browse all current visible lines in the network.

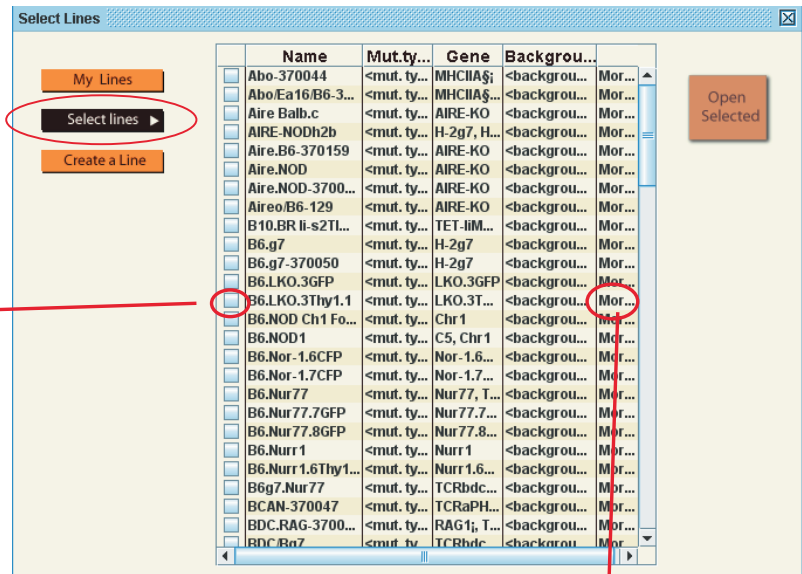

**My lines” :**  
Lines to which the user has  
at least management privileges

### Select lines

List of all lines visible to the user

Check the line(s) to open

The number of lines to open is not limited but only 2 can be viewed simultaneously

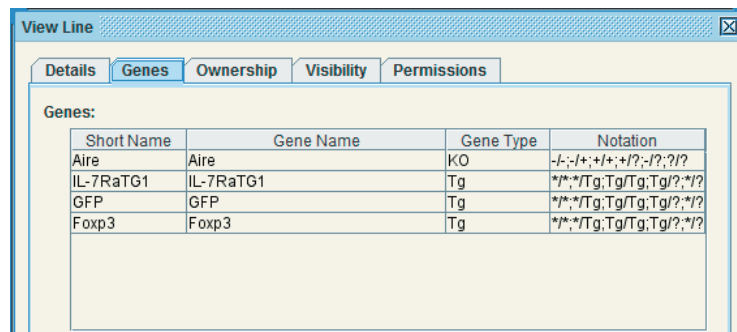

Opens a window with more details about the line (not yet implemented)

Create a new mouse line

**Each line created is defined by :**

- **Lab ownership**
- **General information** : name, facility
- **Monitored Genes** : KO, conditional KO, KI, transgene, natural mutation, polymorphic variant.
- **Visibility** : eg public, owning labs only, specific users.
- **Permissions** : list of users, overseers, caretakers.

# View detailed information for a line

## Availability

### Line name

scroll down the menu  
to choose from the preselected lines

### View options:

Scroll down to choose from the 3 options:

- Cage
- mouse (default view)
- Breeding

Additional filtering option  
for the display

The line details are  
editable by authorized users

**detailed content of the line:**  
population of mice, cages or breeding books  
The content is set by the view options

**Description of the gene  
monitored in that line**

**Choose to view all mice, breeding mice only  
or available mice** (not breeding)  
set to available by default.

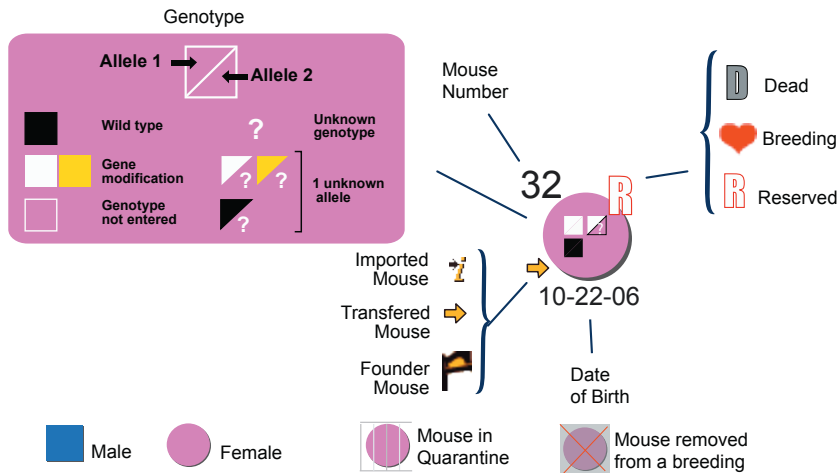

## Genotype

# Show/ organize the display of specific group of mice

## Group/filter mice or cages based on their status, sex, age, genotype

### Main Display Options display:

By default the display is set to “**Available**” cages only (excluding breeding)

Select one of the 3 options by clicking the corresponding buttons:

- **Available** (all cages except breeding)
- **Breeding** (breeding cages only)
- **All**

### Additional sorting/ filtering options:

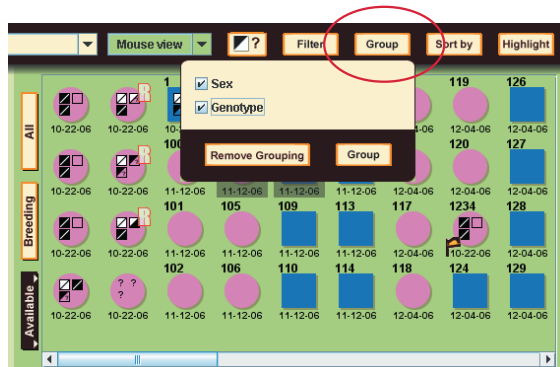

Filter (e.g. show females only)  
Group (e.g. group by litter, genotype...)  
Sort (e.g. sort mice by age)  
Highlight (e.g. highlight females between 3 and 5 weeks).  
(not implemented yet)

All filters/ sorting can be combined with another filtering option(s).  
(e.g. filter females, sort by age).

They can be removed anytime by clicking again on the button.

### Example : Grouping by sex and genotype:

At present only the first gene is used for the grouping

Once applied the option button changes color.

## Actions / Requests to manage a line

|  |  |
|--|--|
|  <p>Update the database on an action taken<br/>Can be a request.</p> <p>Sacrifice</p>   |  <p>Indicate your plan to use a cage/mouse in the near future<br/>( simply indicative, it remains accessible to other users)</p> <p>Reserve</p>                             |
|  <p>Update the database on the status of a mouse</p> <p>Dead Mouse</p>  |  <p>Cancels a reservation made by the same user</p> <p>Unreserve</p>  |
|  <p>Update the database on the status of a cage/breeding.</p> <p>New Litter</p>   |  <p>Deny a reservation made by another user if you have<br/>line overseer privileges for that line.</p> <p>Veto reservation</p>   |
|  <p>Update the database on cage contents.</p> <p>Combine<br/>Cage</p>   |  <p>Indicate that a mouse has been sampled<br/>(tail, blood or other)<br/>Note: <i>a mouse has to be sampled before it a genotype<br/>can be entered.</i></p> <p>Sample</p> |
|  <p>Update the database on cage contents.</p> <p>Split Cage</p>  |  <p>Enter the genotype of a sampled mouse</p> <p>Genotype</p>  |
|  <p>Update the database on cage contents.</p> <p>Wean</p>   |  <p>Give mice/ cages to another user<br/><br/>(not yet implemented)</p> <p>Give</p>   |
|  <p>Post a note/ observation regarding a mouse/cage/<br/>breeding that can be read by users, but does not need<br/>immediate action.<br/><br/>(not yet implemented)</p> <p>Notify</p> |  <p>Transfer a mouse/ cage from one line to another line in<br/>the Mouse 2 network database.</p> <p>Transfer</p>   |
|  <p>Send an alert regarding a mouse/cage/ breeding that<br/>needs action.<br/><br/>(not yet implemented)</p> <p>Alert</p>   |  <p>Export a mouse outside of the facility mouse 2 network.<br/><br/>(not yet implemented)</p> <p>Export</p>  |
|  <p>Set up a new breeding</p> <p>Mate</p>   |  <p>Import a mouse in the database.</p> <p>Import</p>   |
|  <p>Update the status of mice / cage / breeding.</p> <p>Stop breeding</p>   |  |

# Manage a line / update information

- 1 **Select** the mice, cage(s) or breeding to modify by clicking on the target(click to select, click again to de-select)

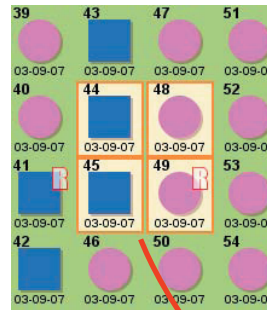

The number of items selected appears on the left side of the line summary

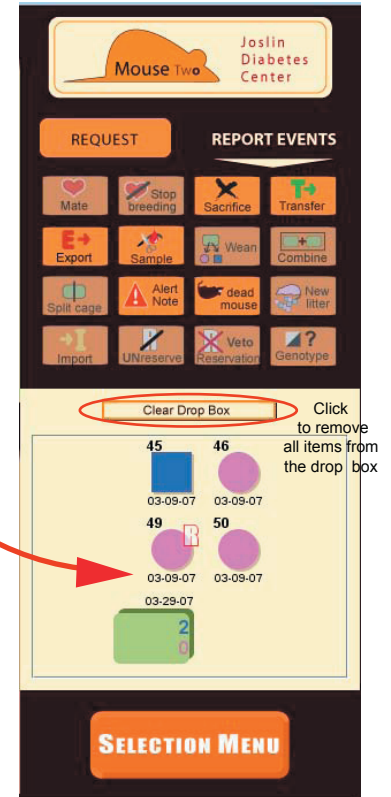

Use the **"clear"** button to cancel all selections for that line

- 2 **Drag** the selection in the drop box

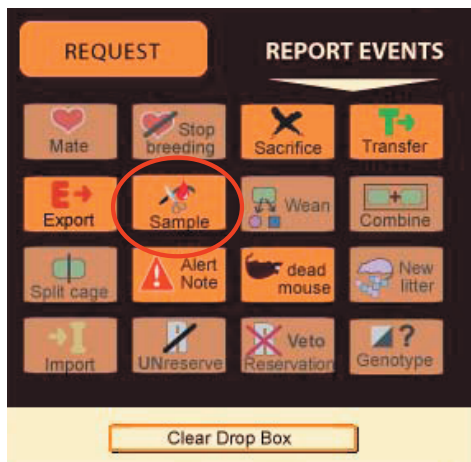

Once in the "drop box",  
The selected mice are no longer selectable in the main line window

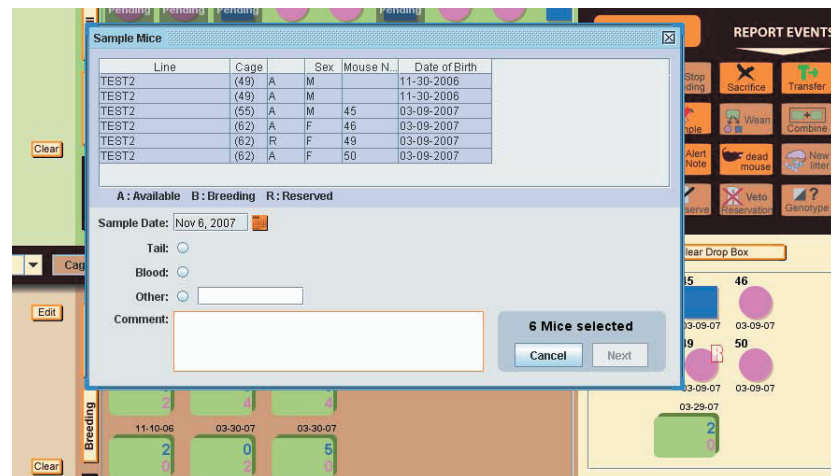

Click to remove all items from the drop box

- 3 Choose an action to apply to the selected mice/ cages in the drop box.  
(The available actions for the selection and user privileges show as orange buttons.)

- 4 When clicking an action (here **"Sample"**) a window opens.  
A list of all the selected mice is displayed  
Fill in the necessary information and click confirm.

**The changes are now updated in the database.**

# Make a request for a remote line

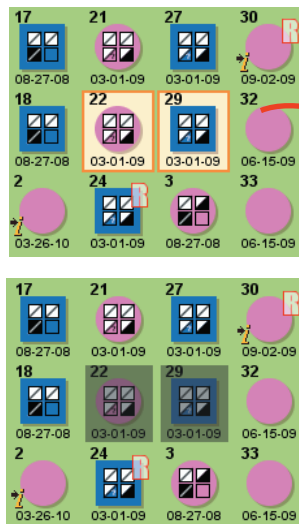

①

Click on the "Request" button to switch between the 2 modes

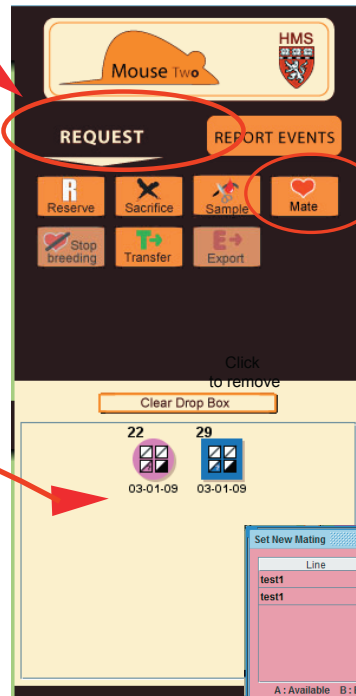

REPORT EVENT MODE :  
Update directly the database.

REQUEST MODE :  
Send a request to the caretaker/line overseer who will fulfill the request ( or deny it).

② Drag the selection in the drop box

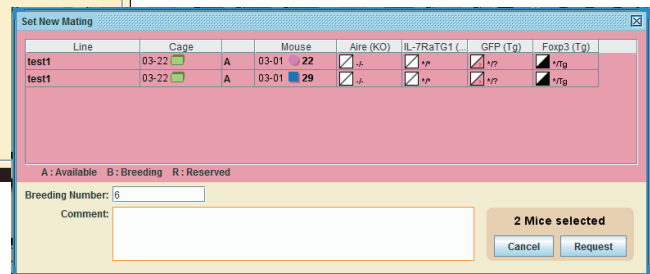

Once in the "drop box",  
The selected mice are no longer  
selectable in the main line window

③

Select the request action and confirm

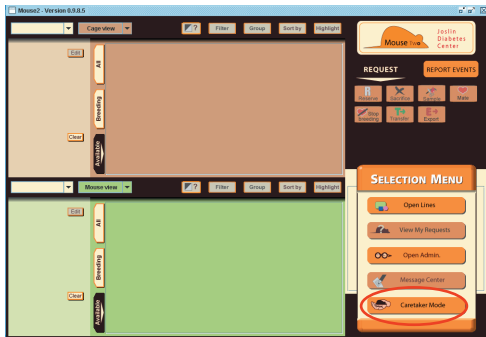

# Check ongoing request status

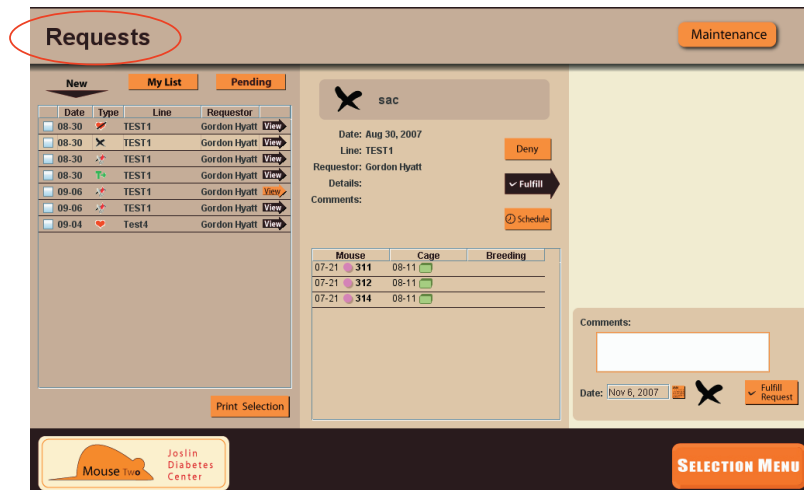

# Caretaker view access (Remote line)

## Management View

## Caretaker View

**REQUESTS:**  
Allows the caretaker to :

- View, print a list of requests
- Deny, fulfill or schedule them

**MAINTENANCE:**  
Allows the caretaker to :

- Update the database on mouse/cage status
- Notify/ send alerts

# Manage Requests (Remote line)

## View, schedule, fulfill or deny requests

Switch to maintenance window

1

### VIEW REQUESTS

Choose the list to display:

**New**  
New requests for THIS user

**My list**  
Requests THIS user has scheduled

**Pending**  
All requests

To print a request (and its details):

- Check to select the requests to be printed
- Hit the "Print selection" button

2

### REQUESTS DETAILS

Click on "View" to display the request details

mouse

3

### MANAGE REQUESTS

Choose between...

#### Deny request

Denial Reason (Required):

Date: Nov 12, 2007

Deny Request

A reason must be entered e.g. mouse dead  
The request will be removed from the list

#### Fulfill request

Comments:

Date: Nov 12, 2007

Fulfill Request

The request will be removed from the list and the database updated with the corresponding changes.

#### Schedule request

Comments:

Date: Nov 12, 2007

Schedule Request

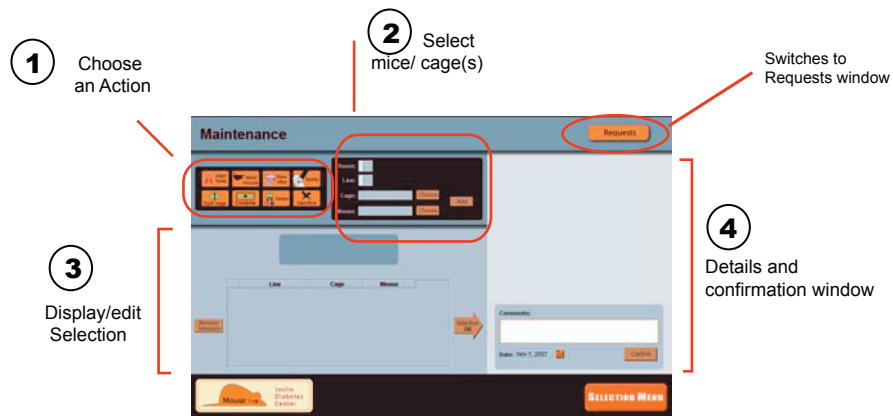

The request will disappear from "new" and display in "my list"

By default the date all actions will be recorded as today's date .  
The date can be edited can be modified using the "calendar button" before confirming the action .

# Maintain a line (Remote line)

Update line information such as death/ birth, weaning, cage separation, etc.

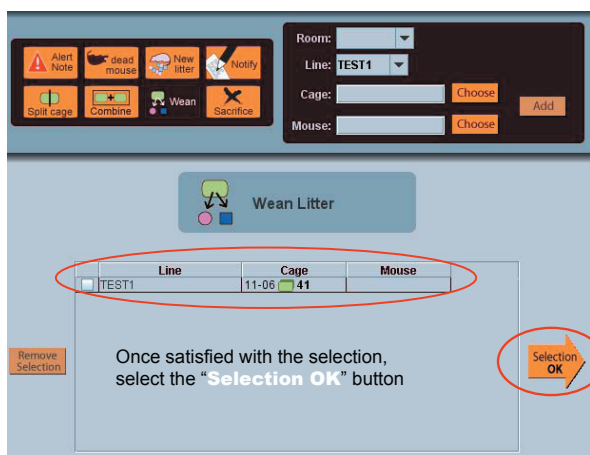

- 1 **Select one of the options,**  
The selected action will appear in the display window

- 3 **The list of selected items is displayed.**

- To remove an item check the case on its left side and use the **"Remove selection"** button.

- To add an item repeat the selection process as in (2)

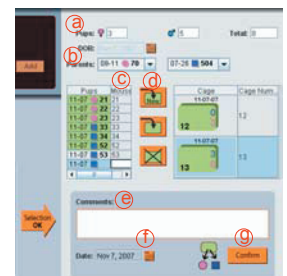

- 2 **Select mice/ cages** you want to update by choosing
  - room number (optional)
  - Line (required)
  - cage or mouse (required) :
    - Enter the mouse cage number directly and select **"Add"**
    - or - Click on the **"Choose"** button. A window opens with a list of selectable items. click one or more mouse/ cage to select it, then **"Add"**.

- 4 Fill in the corresponding details and **confirm**

In the case of weaning a litter:

- a - Enter the number of males/ females
- b - Select the parents
- c - Enter a mouse number ( optional)
- d - Assign cages for the weaned mice ( required)
- e - Add a comment ( optional)
- f - Set the weaning date (optional, by default the current date)
- g - CONFIRM

THE CHANGES ARE NOW UPDATED IN THE DATABASE.
